

2025 Summer Specials

Quarterly Special valid from July 1st – September 30th, 2025

QUINT AC UPS and Battery Module

Online UPS with a pure sine wave reliably supplies your AC loads with a perfect voltage at powers ranging from 1.5 to 2.5 kVA.

The QUINT HP UPS has a slot to accommodate optionally available communication cards such as USB and RS232/RS485. The state of charge of the UPS as well as the buffer time and the service life of the battery module can be viewed at any time via the software.

QUINT HP-UPS		QUINT HP-BAT		Buffertime (2.5 kVA must use 2 battery pairs)

2000-2300 Managed Switches

Simple unmanaged switch or powerful managed switch? The intelligent 2000 switches (Fast Ethernet switch) and 2100 switches (Gigabit switch) combine the best of both worlds. They are as easy to use as an unmanaged switch yet provide the features of a managed switch. This improves the stability and robustness of your machine network.

With easy startup and a variety of versions graded according to the application, the 2200 and 2300 managed switches enable cost-effective management of your Ethernet network. In addition to the extended scope of functions, the 22/23 series offers approvals for the maritime sector, process industry, and feature extended temperature range. Fiber variations are also available.

Compact Power Supply for 24 V DC & 12 V DC STEP3

The STEP3 POWER power supplies offer low power in small spaces only 18mm wide. Choose from 12 V DC 1.3 A or 24 V DC 0.63 A output with Push-in connection. DIN rail mount or panel/wall direct mounting option.

Order no.	Description	Promo Price

M12 Field Wireable Connectors

Features and Benefits

- ✓ **Push-lock Connections:** No tools required, color coded levers, saving you time and effort
- ✓ **Rugged & Durable:** Designed to withstand harsh environments, including vibration, shock, and extreme temperatures
- ✓ **Versatile Applications:** Ideal for automation, machinery, transportation, and industrial networking
- ✓ **Customizable Options:** Available in various pin configurations, orientations, and coding variants to suit your specific needs
- ✓ **Reliable Performance:** Ensures secure and stable connections for signals, data transfer and power supply

Reliable! Flexible! Easy-to-install!

Relays

24 V AC Relay Plug

REL-IR-BL/L-24AC/2X21 — 1109555

Plug-in industrial relay in basic design with power contacts, 2 changeover contacts, test button, status LED, mechanical switch position indicator, input voltage: 24 V AC.

Suitable for various applications and industries, the ECOR 24 V AC relay is mainly used in the Building Automation, HVAC, and Agriculture sector for switching loads such as contactors, fans, lights & pumps. The base is also available at a discounted price, upon request.

\$1.95

*Accessories such as base and bracket available at a discounted price as well upon request

Ex Rated Slim Relay for 12 V DC Applications

PLC-RSC-12DC/21/EX — 2909522

PLC-INTERFACE, consisting of DIN-rail-mountable basic terminal block in 6.2 mm with screw connection and plug-in miniature relay with 6 A power contact, 1 changeover contact, 12 V DC input voltage.

Approved according to ATEX/IECEx (Zone 2) and Ex Zone Class I, Div. 2.

\$7.50

Universal 24 V Slim Relays

PLC-RPT-24UC/21AU — 2900307 | Push-in Connection

PLC-RSC-24UC/21AU — 2966278 | Screw Connection

These universal relays are equipped with gold plated contacts, suitable for low power signals from 10 mA at 100 mV.

They can also behave as a standard relay and switch loads up to 6 A at 250 V AC/DC when the gold layer on the contact is destroyed. The coil input can also be engaged with either 24 V DC or 24 V AC.

\$8.80 ea.

PTIO Sensor Terminal Blocks

- ✓ The sensor output is wired to the same location as the power, simplifying the wire management inside the panel
- ✓ Options for single or multiple outputs are available
- ✓ The Push-in technology reduces the wiring effort and time
- ✓ Modular extension up to a maximum of 50 position using our standard jumpers

Learn more online...

Easy and compact solution for sensor cable wiring in your control panel. The sensor terminal blocks distribute power to all sensors with only one feeding point in the feed-in terminal block.
