

Efficiency In Cabinet Building

Promotional Price Book

Offers valid from:
January 1st – June 30th, 2026

ClipX Workstation

With the ClipX workstation systems, you can easily configure your own individual workstation for efficient and ergonomic working. The modular system can be adapted or extended at any time to meet your requirements. Add our accessories to your workstation or use them with our workstations for rapid process optimization.

- ✔ Workstations are individually equipped and extended with modular, scalable accessories
- ✔ Rapid process optimization and increased efficiency with a concept that is easy to implement
- ✔ Increased productivity due to the ergonomic design and structured arrangement of components
- ✔ Optimized for production processes in control cabinet building based on years of experience in process consulting

ClipX Cutting Station – 1904057

\$7,750.00

This station allows you to cut DIN rail and Cable ducts efficiently. The lower area provides space for storing a variety of DIN rails or wiring channels up to a length of 2 m. The brackets already installed on the frame ensure a strong hold. Another storage area is also available in the upper part of the workstation. The workstation can also be equipped with wheels for mobility in your shop.

	DIN Rail cutting tool		Cable duct cutting tool
	PPS BASIC I/M 1207585		PPS CD M 1207569
	NOW ONLY \$1,025¹		NOW ONLY \$620²

Cutting with millimeter precision

With DIN rail and cable duct cutters, you can set the length exactly using a limit stop. The engraved millimeter and inch area on the measuring rail is permanently resistant to wear. Guides, limit stops, and engraved measuring rails ensure that the material is kept perpendicular for processing with millimeter precision.

¹With a bulk order of 300 metres of DIN rail. Without bulk material order: **1207585** | \$1,700

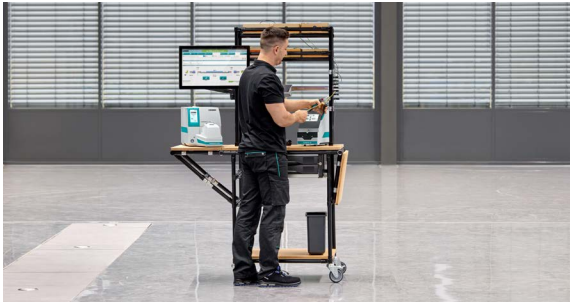

²With a \$2,000 order of cable duct. Without bulk material order: **1207569** | \$1,275

ClipX Assembly Station — 1904058

\$18,275.00

This station enables you to assemble DIN Rail and can be completed with our new software, ClipX Assemble, for seamless integration of ClipX Engineers. It is also equipped with a pick by light system for even better efficiency. Also available without pick by light at a reduced cost. With four storage areas, the upper part offers plenty of space for providing the necessary materials and components for the assembly of DIN rails. The ergonomic design of the workstation enables comfortable working with height adjustment and short reach distances.

ClipX Wiring Station — 1904059

\$6,075.00

This workstation features a practical, lockable toolbox with drawers to keep essential tools within easy reach. Hinged side tables provide additional workspace when needed and fold away to save space. Upper storage areas offer convenient space for materials such as cables and lines. Equipped with braked castors, the mobile workstation can be easily moved to any control cabinet or work location for maximum flexibility.

ClipX Project Trolley — 1904060

\$3,150.00

The project trolley is a versatile solution for production, suitable for commissioning and transport. It can also serve as temporary storage at the assembly workstation, improving organization and efficiency. Its modular design allows flexible adaptation to your needs, while the ergonomic layout and compatibility with magazines and open-front bins simplify loading and expand possible uses.

DIN Rail Assemblies	Custom-Cut DIN Rail	Kitting	Custom Enclosures, Junction Boxes & Back Panels
<p>Fully assembled, tested, and labeled DIN rail solutions built to your specifications, reducing BOM errors, speeding installation, and simplifying ordering with a single part #.</p>	<p>DIN rail cut and punched to exact lengths and hole patterns, ensuring precise fit, faster installation, and cleaner panel layouts.</p>	<p>Custom kits that bundle Phoenix Contact components into one ready-to-use package, minimizing handling, reducing inventory, and streamlining procurement and assembly.</p>	<p>Pre-engineered, fully assembled enclosure solutions designed to your requirements, helping reduce wiring errors, assembly time, and approval complexity.</p>
			
			

Tool deals you wouldn't want to miss!

Professional tools are a prerequisite for excellent results in electrical installation and are probably the most important companion for day-to-day work. Our products are all about precision, durability, and effectiveness. TOOL fox offers a complete portfolio of hand tools and automatic devices for electrical installation work, featuring comfortable handling and delivering high quality.

Printers

With our thermal transfer printers, you can mark large order volumes highly efficiently. The various printers offer a large selection of materials in card format or off the roll. This gives you a complete labeling system that is tailored to your application and optimally supported by the PROJECT complete marking software.

[Learn more online...](#)

- ✓ Reliable, thanks to the proven printing method and high availability
- ✓ Service-friendly, thanks to maintenance-free operation
- ✓ High quality with clear type face, bar codes, and character heights from 1.6 mm

Build your bundle

The Phoenix Contact line of identification solutions includes software, printers and markers and labels for terminal blocks and other components, wires, cables, and electronic and industrial devices, including products from other manufacturers.

We understand that users have different needs based on application and volume and are pleased to introduce this promo. Select the printers that meet your needs and be on your way to a complete solution customized for you.

Please ensure printer and consumable requirements are on the same P.O - See pages 11 and 12 for commonly used cartridges.

Automated Printers

Experience industrial identification in a completely new way with the THERMOMARK E SERIES: printing and application in just a single step! The modular system delivers more efficiency in control cabinet manufacturing: Combine the powerful thermal transfer roll printer with one of the four applicators. The systems print labels and apply them automatically to cables and conductors. They also provide the option to print terminal markers in continuous format and cut them individually to the appropriate pitch. The combination of these process steps results in time savings of around 60%.

[Learn more online...](#)

- 
 Maximum efficiency: time savings of around 60% with printing and application in a single process step
- 
 Flexible response with the modular system comprised of a standard thermal transfer printer and four applicators for different identification solutions
- 
 Consistent digital workflows: controlling and automatic data processing from CAE systems
- 
 Easy handling and constantly high quality with the automated process

Marking wherever you want, directly on site

The THERMOMARK GO is the digital marking solution for use in the field. Using your smartphone and the MARKING system app, you can create marking files very easily and control the printer directly via Bluetooth 5. The smart system works with continuous media as well as pre-punched labels in roll format.

[Learn more online...](#)

- ✔ Can be operated directly with a smartphone or tablet via a Bluetooth or NFC interface
- ✔ Greater flexibility for everyday work, marking, and labeling directly on site
- ✔ Wide material selection and automatic material detection
